

You are:

Green Curious

I work as a gender expert or activist, and am looking to bring more environmental consciousness into my work.

Questions to ask your team

If you're involved in funding and strategy...

You might be: [senior leadership, a program officer, part of an investment team](#)

How might we partner with organizations who might be more environmentally conscious to bolster our existing work?

How might we integrate green agenda regenerative and restorative policies in our existing gender programming?

If you're involved in implementation and execution...

You might be: [a gender practitioner, a green agenda practitioner, or part of technical and program staff](#)

How might we identify existing projects that could weave in more environmental consciousness?

How might we collect data which highlight the value of integrating gender and green agenda priorities?

Stories in this quadrant

1

Lessons from a Climate Crisis: Planning for Protection in Rural Pakistan

In a mountainous region of rural Pakistan, the serene landscape was marred by a series of natural disasters, including earthquakes, floods, and droughts. The impact of these geological challenges were exacerbated by deeply rooted gender norms and societal structures.

Women in the Workforce: A Case Study on Gender Performance Incentives in Latin America and Bangladesh

In the quest for gender equality and economic empowerment, innovative approaches are emerging to incentivize the private sector to actively engage in advancing the role of women in their workforce. This case study explores two remarkable initiatives that have successfully harnessed gender performance incentives.

Putting Gender in the Front Seat

Across India, a unique collaboration emerged as an Indian Electric Vehicle (EV) company, **GreenCell Express Private Limited**, sought financing from the Asian Development Bank (ADB). Their initial goal was to promote clean and sustainable transportation, thereby reducing emissions and mitigating climate impact in India. However, ADB's commitment to gender inclusivity sparked a new perspective.

From Stoves to Solutions: Addressing Gender Disparities through Clean Cooking

Greenway Grameen Infra Private Limited, operating in the Indian states of Madhya Pradesh and Odisha, is committed to enhancing women's health, safety, and livelihoods through efficient cooking solutions. They plan to distribute 1 million improved cookstoves (ICSs) to rural households at an 85% subsidy, offering improved combustion to reduce wood consumption, lower carbon dioxide (CO₂) emissions, and decrease indoor air pollution, ultimately contributing to reduced deforestation.
